EDUCATION

New York University, New York, USA

Sept 2024 – Apr 2026

Master of Science in Computer Engineering

GPA: 3.556 / 4.00

Courses – Machine Learning, Deep Learning, High Performance Machine Learning, Big Data, Real-Time Embedded Systems

Dwarkadas J. Sanghvi College of Engineering, Mumbai, India

Jun 2024

BTech in Information Technology with Minor in Web Application Development

GPA: 9.09 / 10.00

Courses – Advanced Machine Learning, Artificial Intelligence, Database Management, Data Structures and Algorithms, Software Engineering

TECHNICAL SKILLS

Technologies and AI/ML Frameworks: Python, Java, R, SQL, MongoDB, Pinecone, ChromaDB, TensorFlow, PyTorch, JAX, LangChain, Hugging Face, Pandas, NumPy, Scikit-learn, CuDF, CuDNN, ONNX, TensorRT, TensorLLM, NVIDIA NIM, Ollama, Autogen, Phidata, CrewAI

Tools and Deployment Platforms: Colab, Visual Studio Code, Jupyter, Streamlit, Flask, Tableau, PowerBI, GitHub, AWS, GCP, Azure

PROFESSIONAL EXPERIENCES

Cloud Counselage Pvt. Ltd

Jan 2024 – Aug 2024

AI/ML Domain Lead

- Mentored over 200 interns on AI/ML projects, framing problem statements for initiatives such as an **AI chatbot** for 'Industry Academia Community' member queries and an **AI-driven talent acquisition system**.
- Addressed technical queries and provided guidance to ensure projects met industry standards, earning 'Best Mentor' recognition and the 'Industry Academia Excellence Award 2024'.

Project Lead

Mumbai, India

- Facilitated candidate interviews and led a team to develop a **Template Matching Algorithm** by fine-tuning open-source **Llama3** from Hugging Face, utilizing **JAX** for efficient **gradient calculations** during model fine-tuning and **TensorRT-LLM** for **accelerated inferencing**, to automate **submission completion checks, plagiarism detection, and quality assurance**.
- Attained a **95% accuracy** rate in **real-time assessments** of intern submissions across multiple domains (**AI, ML, Cloud, Web Development**) for the 'Industry Academia Community'.

Indian Institute of Technology

Mar 2024 – Aug 2024

LLM Research Intern

Bihar, India

- Developed and **fine-tuned** open-source LLMs (**Mistral, Llama2, Zephyr, CodeGen, CodeGemma**) by applying PEFT techniques (**LORA, QLORA**) for **Adverse/Non-Adverse drug reaction classification** and **sentiment analysis** of Hinglish (code-mixed) tweets.
- Used **CuDF** for **GPU-accelerated tokenization** to optimize **data preprocessing** workflows; conducted comparative analysis with **BiGRU, BiLSTM**, and **BiRNN** models, with LLMs attaining a **98% accuracy score**, outperforming these deep learning models.

Rejolut- A Web 3.0 Company

Mar 2024 – May 2024

Artificial Intelligence Intern

Mumbai, India

- Researched a range of closed-source LLMs such as **GPT-3.5, Gemini** and **Claude**, comparing **input-output token pricing** and **performance benchmarks**, to select the optimal model for contract analysis.
- Engineered an **AI co-pilot** and **PDF reader RAG** system deploying **LangChain** and **GPT-3.5**, achieving **98% accuracy** in enhancing SAM.gov's contract management through **precise text extraction** and **responsive query handling**.

PROJECTS

Evaluation of AI Agent Frameworks for Financial Data Extraction and Analysis

Dec 2024

- Designed and implemented **financial analysis agents** using **Phidata, Autogen**, and **CrewAI**, hosted on **Ollama**, leveraging tools like **YFinance, LangChain, SQLite, DuckDuckGo**, and **GPT-4** for **dynamic stock data retrieval** and **analysis**.
- Utilized **NIM** for **embedding generation** and **inference optimization**, with **Autogen** achieving **10% higher accuracy** and **Phidata** excelling with **15% faster response times**, highlighting their distinct strengths in financial automation.

Distributed Image Classification on Android with Real-Time Optimization

May 2024

- Constructed a distributed machine learning image classification system across interconnected Android devices, using **MobileNet (TensorFlow Lite), ONNX Runtime** and **Flutter** to optimize processor loads and **reduce inference times by 30%**.
- Enhanced system accuracy with **real-time image capture, WiFi P2P weight distribution**, and **AWS local storage**. Exported the trained model to **ONNX format** for efficient **cross-platform deployment**, earning the 'Best Software Project' award at **DJSCE Trinity TechExpo 2024**.

AI-Powered Adaptive MCQ Testing System for Government Exam Preparation

Jan 2024

- Built an adaptive MCQ testing system for Parakh, an Indian government exam preparation platform, utilizing **AWS**, ML models (**K-Means, Item Response Theory, Bayesian Knowledge Tracing**), a web stack (**React, Django**) with **SQL** for scalable **user data visualization**.
- Won **first place at Smart India Hackathon 2023**, presented the project to **education minister**, and was selected as a **mentor for SIH 2024** by the Ministry of Education.
