ABOUT ME

Research Interests: Computer Security, Privacy, Cloud Computing, Privacy-preserving AI, Distributed Systems, Cryptography

EDUCATION AND TRAINING

Bachelor of Science

Shahjalal University of Science and Technology [28/01/2017 – 23/02/2022]

City: Sylhet | Country: Bangladesh | Website: <https://www.sust.edu/> | Field(s) of study: Computer Science and Engineering
| Final grade: 3.55

PUBLICATIONS

[2023]
A systematic literature review of blockchain-based e-KYC systems In *Computing* 105, 2089–2118 (2023). DOI: [10.1007/s00607-023-01176-8](https://doi.org/10.1007/s00607-023-01176-8)

RESEARCH EXPERIENCE

[09/2021 – 09/2022]
Research on A Blockchain Empowered e-KYC and Reputation System

Research Assistant

- Using their reputation score from NGOs, this project will help poor village women and other marginalized individuals gain access to traditional banking (non-traditional financial service providers). It will also allow multiple organizations to collaborate and open the possibility of new financial services.
- I worked as one of the Research Assistants in this project and did a systematic literature review of existing blockchain-based e-KYC systems. I also wrote the review paper which is currently under review.

[01/2020 – 06/2021]
Shahjalal University Blockchain and Security Laboratory

Research Assistant

- Identified several vulnerabilities in current blockchain systems and analyzed their threats.
- Modeled several attacks in blockchain systems using Petri nets concerning traditional and quantum computers.

TEACHING EXPERIENCE

[03/2022 – 07/2022]
Blockchain Introduction Online Course

- Instructed on cryptocurrencies and how blockchain, the underlying technologies of all those cryptocurrencies work, step by step
- Taught some of the most common crypto algorithms on which the security of the whole blockchain and the internet relies on
- Introduced students to new technologies like DApps, web3.0, and NFT
- Guided in building a very simple app/website based on Hyperledger Fabric

WORK EXPERIENCE

Associate Software Engineer

Dynamic Solution Innovators [02/05/2021 – Current]

City: Dhaka | Country: Bangladesh | Website: <https://www.dsinnovators.com/>

- I have been working as a full-stack developer in two government projects, Primary Education Management Information System ([PEMIS](#)) and Teacher Transfer Management System ([TTMS](#)), for the last 1.5+ years. All the primary schools in Bangladesh are currently using the systems. I am now a core member of this team and currently handling some important features such as transferring teachers within different primary schools using *Spring Batch*. Some of the core technologies used in these projects are *Spring Boot*, *Thymeleaf*, *JSP*, *Kubernetes*, and *Oracle*.
- Previously worked for more than 1.5+ years as a full-stack developer in another government project called Integrated Educational Information Management System (IEIMS). I was one of the key members of the team who was fully responsible for one module called "Board Registration" which will be used by millions of students and teachers in the upcoming years. Some of the core technologies used in the project are *Spring Boot*, *Next.js*, *Kubernetes*, and *Microsoft SQL Server*.

PROJECTS

GoodsLedger • Android • Java • Hyperledger Fabric

Created an Android app with a server based on Hyperledger Fabric to detect counterfeit products using blockchain.

Links: <https://tinyurl.com/GdlrApp> | <https://tinyurl.com/GlrSrvr>

GetPureCure App • Android • Java • MongoDB

Created the Android part of a full-fledged e-commerce website acting as a common platform for patients, doctors, and medical students for better communication.

Link: <https://tinyurl.com/GetPureCure>

GetPureCure Website • React • ExpressJS • MongoDB

Created a full-fledged e-commerce website that can sell medical products and connect patients, doctors, and medical students for better communication

Link: <https://tinyurl.com/tlpncsk>

P2P Chat • Android • Java • Socket.IO

Created a messaging app based on a P2P network.

Link: <https://tinyurl.com/tlpncsk>

Routine Management System • React • Laravel • MySQL

Created a web application for managing class routines.

Link: <https://tinyurl.com/sustRMS>

DIGITAL SKILLS

Programming Languages

Java / JavaScript / C / Python / C++ / Bash / Go

Frameworks and Libraries

HTML & CSS / Next.js / Spring Boot / Hyperledger Fabric / React & Redux / Android SDK / Node.js / Express.js / Thymeleaf / Tailwind CSS / Liquibase / Laravel

Databases

MySQL / Microsoft SQL Server / Oracle / MongoDB / Firebase / Redis

Major Tools

Git / LaTeX / Docker / Azure

EXTRA CURRICULAR ACTIVITIES

Problem Solving

- Solved around 500+ problems in various online judges including Codeforces, HackerRank, LightOJ, VJudge, Rosalind, and UVA.
- Codeforces ID: [mdatikshahriar](#)
- HackerRank ID: [mdatikshahriar](#)

STANDARDIZED TEST SCORES

[11/11/2024]

Graduate Record Examination (GRE)

Total: **312**

Verbal: 149 | Quant: 163 | Analytical Writing: Not yet received

[22/11/2022]

International English Language Testing System (IELTS)

Total: **7.5**

Reading: 9 | Listening: 8.5 | Speaking: 6.5 | Writing: 6.5
